

Motorola Mobile Sales Dashboard Report

1. Executive Summary

The Motorola Mobile Sales Dashboard is an interactive Business Intelligence solution developed using Power BI to analyze mobile phone sales data. The dashboard enables users to monitor key business metrics, identify sales trends, evaluate customer satisfaction, and gain insights into product and regional performance.

The objective of this project is to transform raw sales data into meaningful visual insights that support business decision-making and performance monitoring.

2. Project Objectives

The primary objectives of this project are:

- Analyze overall sales performance.
 - Monitor monthly sales trends.
 - Evaluate sales distribution across cities.
 - Identify top-performing mobile models and brands.
 - Understand customer satisfaction through ratings.
 - Analyze customer payment preferences.
 - Provide interactive filtering for detailed analysis.
-

3. Tools and Technologies Used

Tool	Purpose
Power BI Desktop	Dashboard Development
Microsoft Excel	Data Source
Power Query	Data Cleaning and Transformation
DAX	KPI and Measure Creation

4. Dataset Description

The dataset contains sales transaction records related to Motorola mobile phone sales.

Key Attributes

- Transaction ID
 - Mobile Brand
 - Mobile Model
 - Sales Amount
 - Quantity Sold
 - Customer Rating
 - Payment Method
 - City
 - Transaction Date
-

5. Data Preparation

The following preprocessing steps were performed:

Data Cleaning

- Removed duplicate records.
- Checked for missing values.
- Standardized data formats.

Data Transformation

- Created date hierarchy.
 - Generated calculated measures using DAX.
 - Optimized data relationships for reporting.
-

6. Dashboard KPIs

KPI	Value
Total Sales	769 Million
Total Transactions	4 Thousand
Total Quantity Sold	19 Thousand
Average Price	40 Thousand

These KPIs provide a high-level overview of business performance.

7. Dashboard Visualizations

7.1 Sales by City

A map visualization displays sales performance across different cities.

Insights:

- Major metropolitan cities contribute significantly to overall sales.
 - Regional demand variations can be identified quickly.
-

7.2 Monthly Sales Trend

A line chart illustrates monthly sales performance throughout the year.

Insights:

- Sales fluctuate across months.
 - Peak sales periods can be identified for strategic planning.
-

7.3 Customer Ratings Analysis

A funnel chart presents customer rating distribution.

Insights:

- Most customers provide positive ratings.
 - Customer satisfaction levels can be monitored effectively.
-

7.4 Payment Method Analysis

A pie chart shows transaction distribution by payment method.

Methods Included:

- UPI
- Credit Card
- Debit Card
- Cash

Insights:

- Digital payment methods account for a significant portion of transactions.

- Customer payment preferences can be analyzed for business planning.
-

7.5 Brand Performance

A tabular visualization compares brands based on:

- Total Sales
- Number of Transactions
- Average Price

Insights:

- Apple generated the highest sales revenue among displayed brands.
 - Brand-level comparisons help evaluate market performance.
-

7.6 Top 5 Models by Sales

A bar chart ranks the top-selling mobile models.

Insights:

- Vivo Y51 achieved the highest sales among the listed models.
 - Product performance can be monitored for inventory and marketing decisions.
-

7.7 Sales by Day

An area chart analyzes sales performance across weekdays.

Insights:

- Sales are relatively consistent during most weekdays.
 - Certain days contribute more revenue than others.
-

8. Interactive Features

The dashboard includes dynamic filters for:

- Month
- Brand
- Mobile Model
- City

These filters enable users to perform detailed exploratory analysis and generate customized insights.

9. Key Business Insights

1. Total sales reached 769 million.
 2. More than 4,000 transactions were recorded.
 3. Approximately 19,000 units were sold.
 4. Apple generated the highest overall sales revenue.
 5. Vivo Y51 emerged as the top-selling model.
 6. Digital payment methods dominate customer transactions.
 7. Sales performance varies across cities and months.
 8. Customer ratings indicate generally positive satisfaction levels.
-

10. Conclusion

The Motorola Mobile Sales Dashboard successfully converts raw sales data into actionable business insights through interactive visualizations and KPI monitoring. The dashboard supports strategic decision-making by providing a comprehensive view of sales performance, customer behavior, product demand, and regional trends.

This project demonstrates practical skills in data cleaning, data modeling, DAX calculations, business intelligence reporting, and dashboard design using Power BI.

Skills Demonstrated

- Data Analysis
 - Data Visualization
 - Business Intelligence
 - Power BI Development
 - Data Modeling
 - Power Query
 - DAX
 - Dashboard Design
 - KPI Development
 - Reporting and Analytics
